

NHS SUMMARY CARE RECORD WITH ADDITIONAL INFORMATION

You most likely have a Summary Care Record (SCR) already, which includes important information about:

- Medicines you take
- Allergies and sensitivities

In an emergency situation, your SCR can be a vital aid for the 111, ambulance, hospital staff etc. They will always ask your permission before they view your SCR.

The next step....

You can now choose to have additional information added to your SCR, including:

- **Your long term health conditions** such as asthma, diabetes, heart problems or rare medical conditions
- **Your relevant medical history** – clinical procedures that you have had, why you need a particular medicine, the care you are currently receiving and clinical advice to support your future care
- **Your health care preferences** – you may have your own care preferences which will make caring for you more in line with your needs, such as special dietary requirements
- **Your personal preferences** – you may have personal preferences, such as religious beliefs or legal decisions that you would like to be known
- **Immunisations** – details of previous vaccinations, such as tetanus and routine childhood jabs

If you would like this information adding to your SCR then please complete the following information and hand this form to the practice receptionist:

Name:	
Date of Birth:	
Signature:	
Date	
Signed for (Parent/Legal Guardian)
