

We're here for you evenings and weekends

Evening and weekend GP appointments are available in Newham at your GP practice or an NHS service nearby

- You can see a doctor, nurse, pharmacist or other healthcare professional based on the nature of your issue.
- This service is known as 'enhanced access' and is organised by your local primary care network. These are groups of GP practices that work together to offer local services.
- You may not be seen by a healthcare professional from your registered GP Surgery.
- Healthcare professionals will have access to your medical record, so your full medical history will be known and can be updated.
- Appointments must be booked in advance.
- You can book an appointment by speaking to the reception staff at your GP practice.
- Some GP practices have a dedicated phonenumber for booking evening and weekend appointments. (Details on the back on this leaflet.)
- Please note this is NOT an emergency service.
