**Contraception and Sexual Health Clinics during Covid-19 Crisis**

Recent changes have been introduced at the Hillingdon Integrated Sexual Health service during the Covid-19 pandemic.

Patients contacting the service are being triaged using a telephone consultation and they have limited face to face contact for urgent cases only.

Asymptomatic patients and women with vaginal discharge are asked to access <http://www.SH24.org.uk> for testing, and advised to obtain Thrush and BV treatment over the counter as necessary.

Patients seeking oral Emergency Contraception can also access this via <http://www.SH24.org.uk>.

There is no clinical activity at Hesa, Fountain's Mill and Oaklands medical centre and we are currently operating from Caryl Thomas Clinic (Harrow). However, the medication pick up (for contraception and sexual health) are available from Oaklands medical centre.

Patients requesting a consultation should be advised to contact us on:

020 8453 2751

020 8453 2752

and check this website for service changes:
