

The National Summary Care Record – Core/Basic – Privacy Notice

Summary:

The Summary Care Record is an English NHS development. It consists of a basic medical record held on a central government database on every patient registered with a GP surgery in England. The basic data is automatically extracted from your GP’s electronic record system and uploaded to the central system GPs are required by their contract with the NHS to allow this upload. The basic upload consists of current medication, allergies and details of any previous bad reactions to medicines, the name, address, date of birth and NHS number of the patient

As well as this basic record additional information can be added, and this can be far reaching and detailed. However, whereas the basic data is uploaded automatically any additional data will only be uploaded if you specifically request it and with your consent.

Summary Care Records can only be viewed within the NHS on NHS smartcard-controlled screens or by organisation, such as pharmacies, contracted to the NHS.

You can find out more about the SCR here:

You have the right to object to our sharing your data in these circumstances and you can ask your GP to block uploads.
