The NHS provides national screening and reporting programmes so that certain diseases can be detected at an early stage. These currently apply to bowel cancer, breast cancer, aortic aneurysms, and diabetic retinal screening service as well as other programmes (HPV Vaccinations, Childhood Immunisations, Pre-School Booster Vaccinations, Organ Donor Registration Details and Blood Donor Registration Details. The law allows us to share your contact information with Public Health England and NHS England so that you can be invited to the relevant screening programme and so that nationally exempted programmes can operate effectively with regards to public and patient health.

More information can be found at: https://digital.nhs.uk/services/national-data-opt-out/compliance-with-the-national-data-opt-out (select link for Data Uses and Releases Compendium) or speak to the practice.

10) National Data Opt Out	Whenever you use a health or care service, such as attending
	Accident & Emergency or using Community Care services,
	important information about you is collected in a patient record for
	that service. Collecting this information helps to ensure you get the
	best possible care and treatment.
	The information collected about you when you use these services
	can also be used and provided to other organisations for purposes
	beyond your individual care, for instance to help with:
	beyond your marviadar care, for instance to help with.
	improving the quality and standards of care provided
	research into the development of new treatments
	preventing illness and diseases
	monitoring safety
	planning services
	planning convices
	This may only take place when there is a clear legal basis to use
	this information. All these uses help to provide better health and
	care for you, your family and future generations. Confidential
	patient information about your health and care is only used like this
	where allowed by law.
	Most of the time, anonymised data is used for research and

planning so that you cannot be identified in which case your confidential patient information isn't needed.

You have a choice about whether you want your confidential patient information to be used in this way. If you are happy with this use of information you do not need to do anything. If you do choose to opt out your confidential patient information will still be used to support your individual care.

To find out more or to register your choice to opt out, please visit www.nhs.uk/your-nhs-data-matters On this web page you will:

- See what is meant by confidential patient information.
- Find examples of when confidential patient information is used for individual care and examples of when it is used for purposes beyond individual care.
- Find out more about the benefits of sharing data.
- Understand more about who uses the data.
- Find out how your data is protected.
- Be able to access the system to view, set or change your opt-out setting
- Find the contact telephone number if you want to know any more or to set/change your opt-out by phone
- See the situations where the opt-out will not apply.

You can also find out more about how patient information is used at:

https://www.hra.nhs.uk/information-about-patients/ (which covers health and care research); and

https://understandingpatientdata.org.uk/what-you-need-know (which covers how and why patient information is used, the safeguards and how decisions are made)

You can change your mind about your choice at any time.

Data being used or shared for purposes beyond individual care does not include your data being shared with insurance companies or used for marketing purposes. Data would only be used in this

way with your specific agreement.

* "Common Law Duty of Confidentiality", common law is not written out in one document like an Act of Parliament. It is a form of law based on previous court cases decided by judges; hence, it is also referred to as 'judge-made' or case law. The law is applied by reference to those previous cases, so common law is also said to be based on precedent.

The general position is that if information is given in circumstances where it is expected that a duty of confidence applies, that information cannot normally be disclosed without the information provider's consent.

In practice, this means that all patient information, whether held on paper, computer, visually or audio recorded, or held in the memory of the professional, must not normally be disclosed without the consent of the patient. It is irrelevant how old the patient is or what the state of their mental health is; the duty still applies.

Three circumstances making disclosure of confidential information lawful are:

- where the individual to whom the information relates has consented;
- · where disclosure is in the public interest; and
- where there is a legal duty to do so, for example a court order.
