This merger is driven by our shared vision...

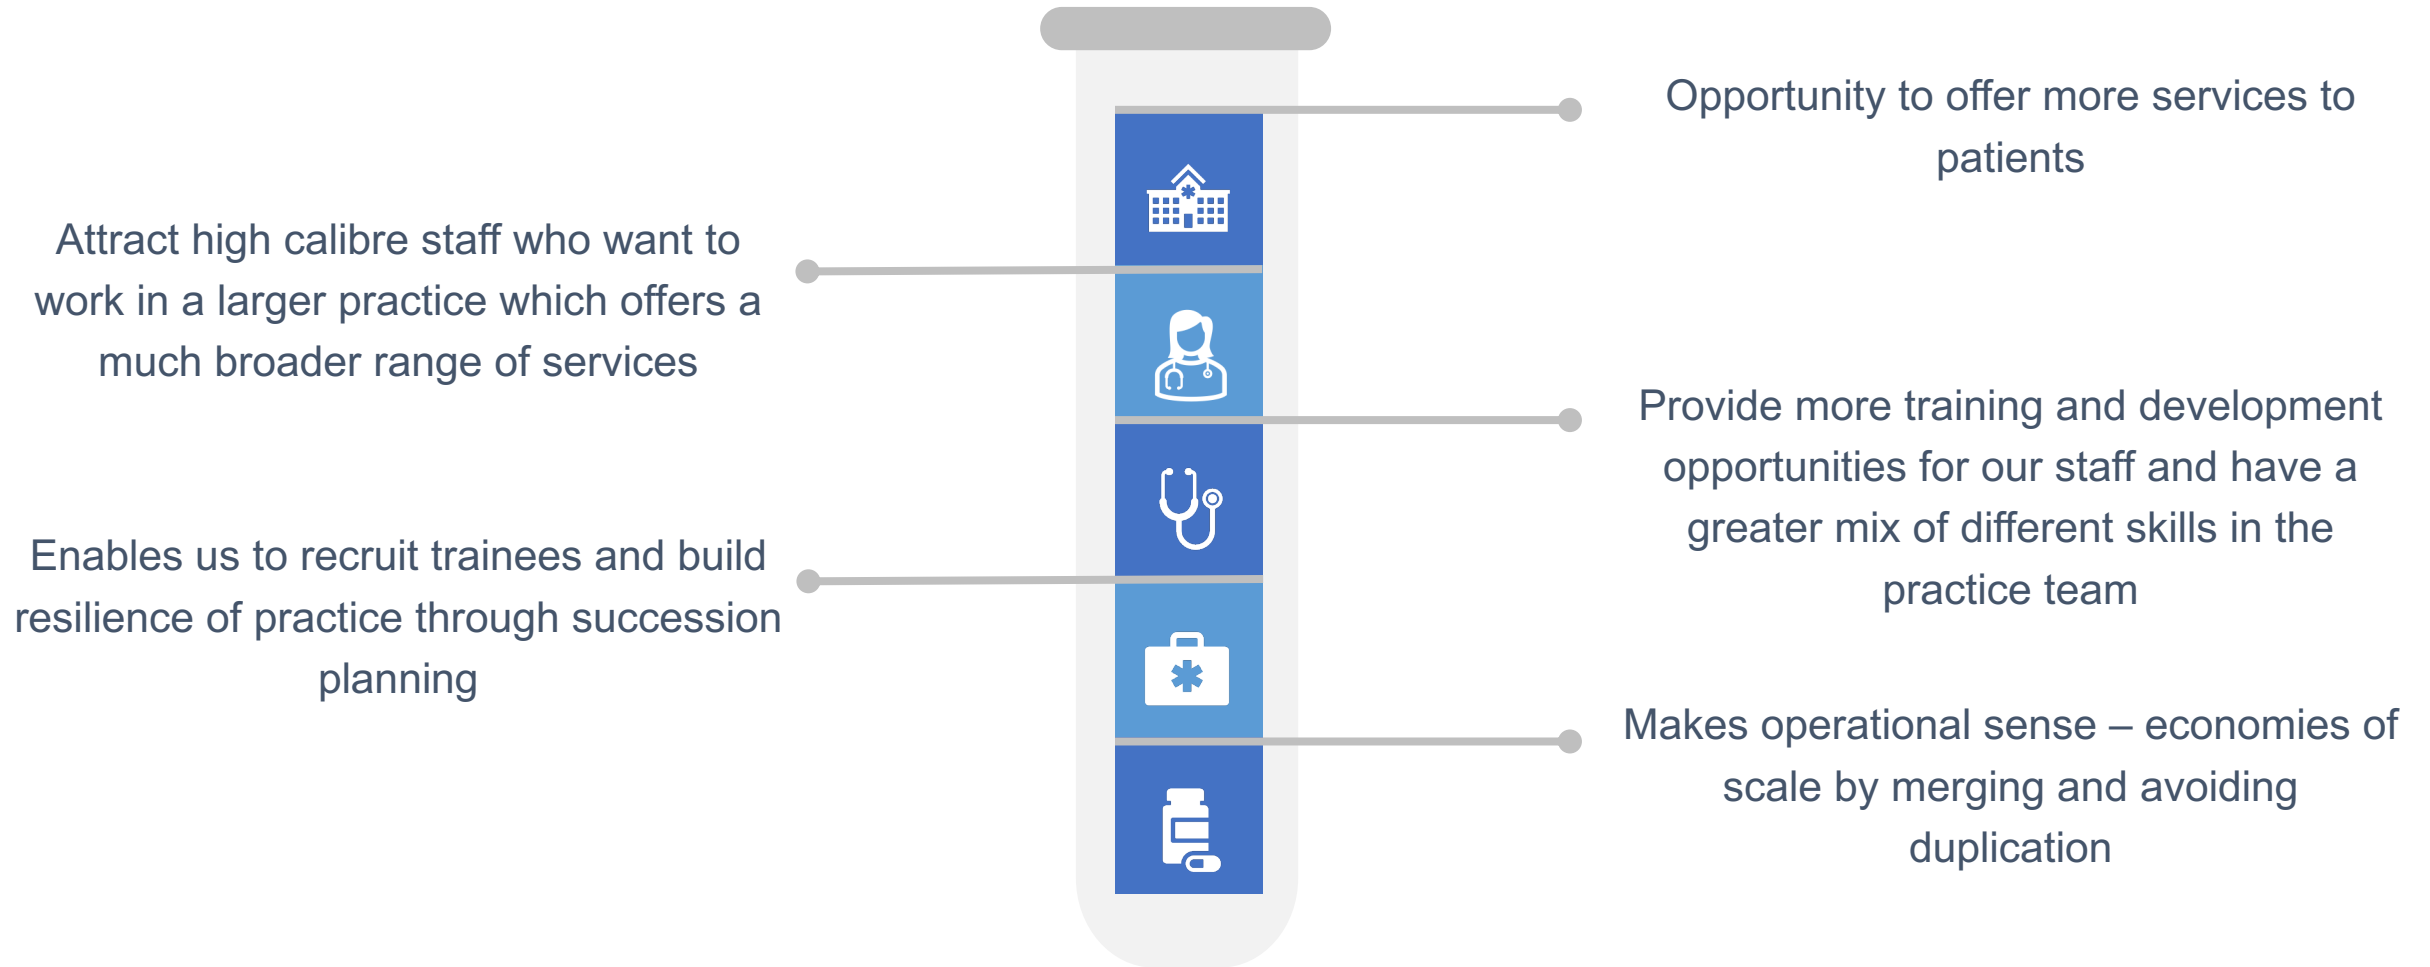

The practices share a vision for the delivery of primary care that is patient centred:

- This means that patients will be offered choice.
- Continuity within each episode of care.
- Services that are proactive, coordinated and available close to home.
- Support the 'whole person' and their health and wellbeing rather than just treating illness.
- With the local community integral to the delivery of care.

Some of our key priorities:

- Ensure that all patients experience care that is person-centred
- Address health inequalities across the population
- Integrate and enhance access to a wider range of clinical services that can be delivered closer to home
- Drive early identification and consistent management of long-term conditions to prevent escalation and complications
- Renew focus on prevention of ill health - supporting and encouraging people to live healthier lives
- Strengthen ability to recruit, support and retain high quality team members
- Establish a centre for excellence in primary training, introducing more trainees with clinical and non-clinical skills that are required locally
- One-stop provision of services, reducing the requirement to make multiple visits leading to reduced need for patient travel

The merger will help us to achieve our ambition...

Patient benefits

We can offer more appointments; so, you get the care you need, when you need it

Flexibility so you can access services at either of our two sites in the future

Provide more services such as tests, diagnostics, vaccinations, and proactive care for those with long-term conditions

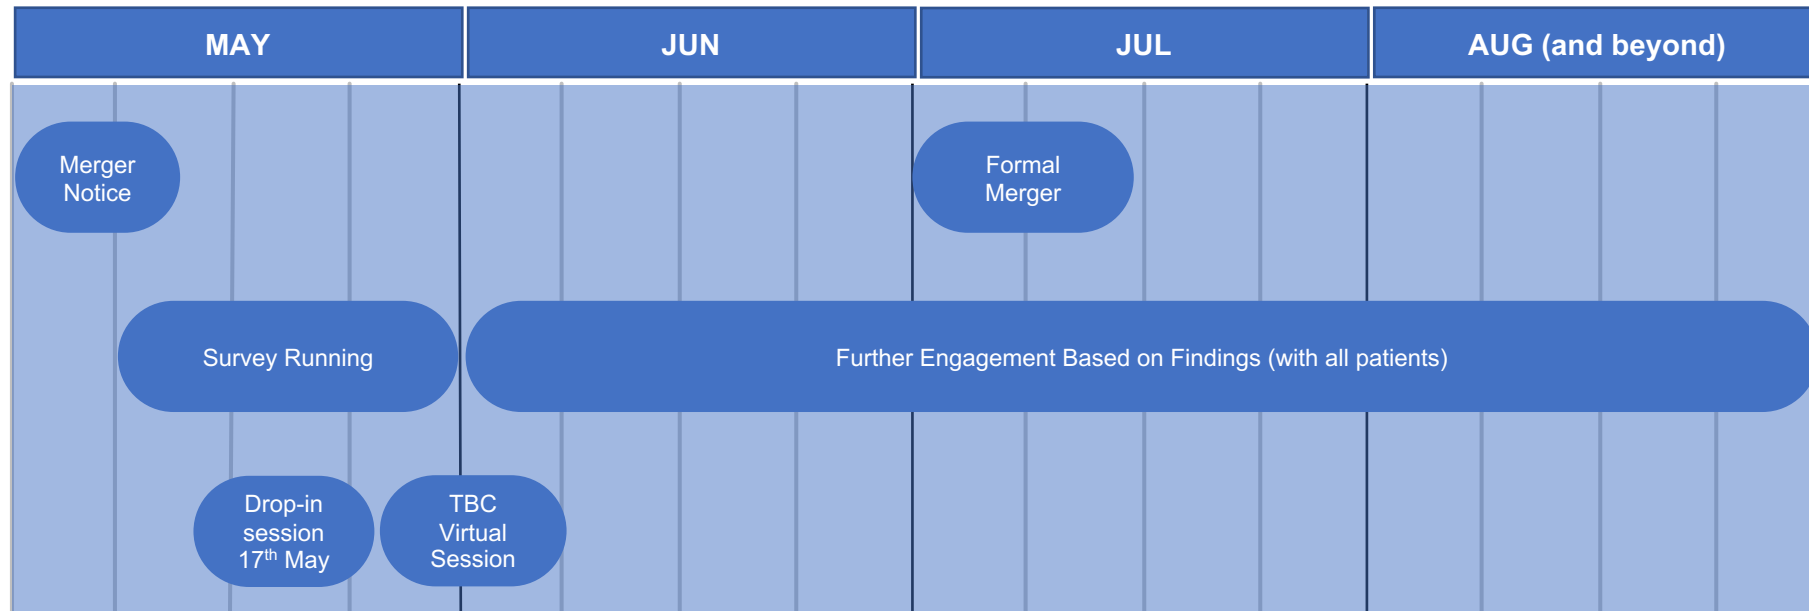

Provide patients with more support when it is needed from other local health services, such as community nurses

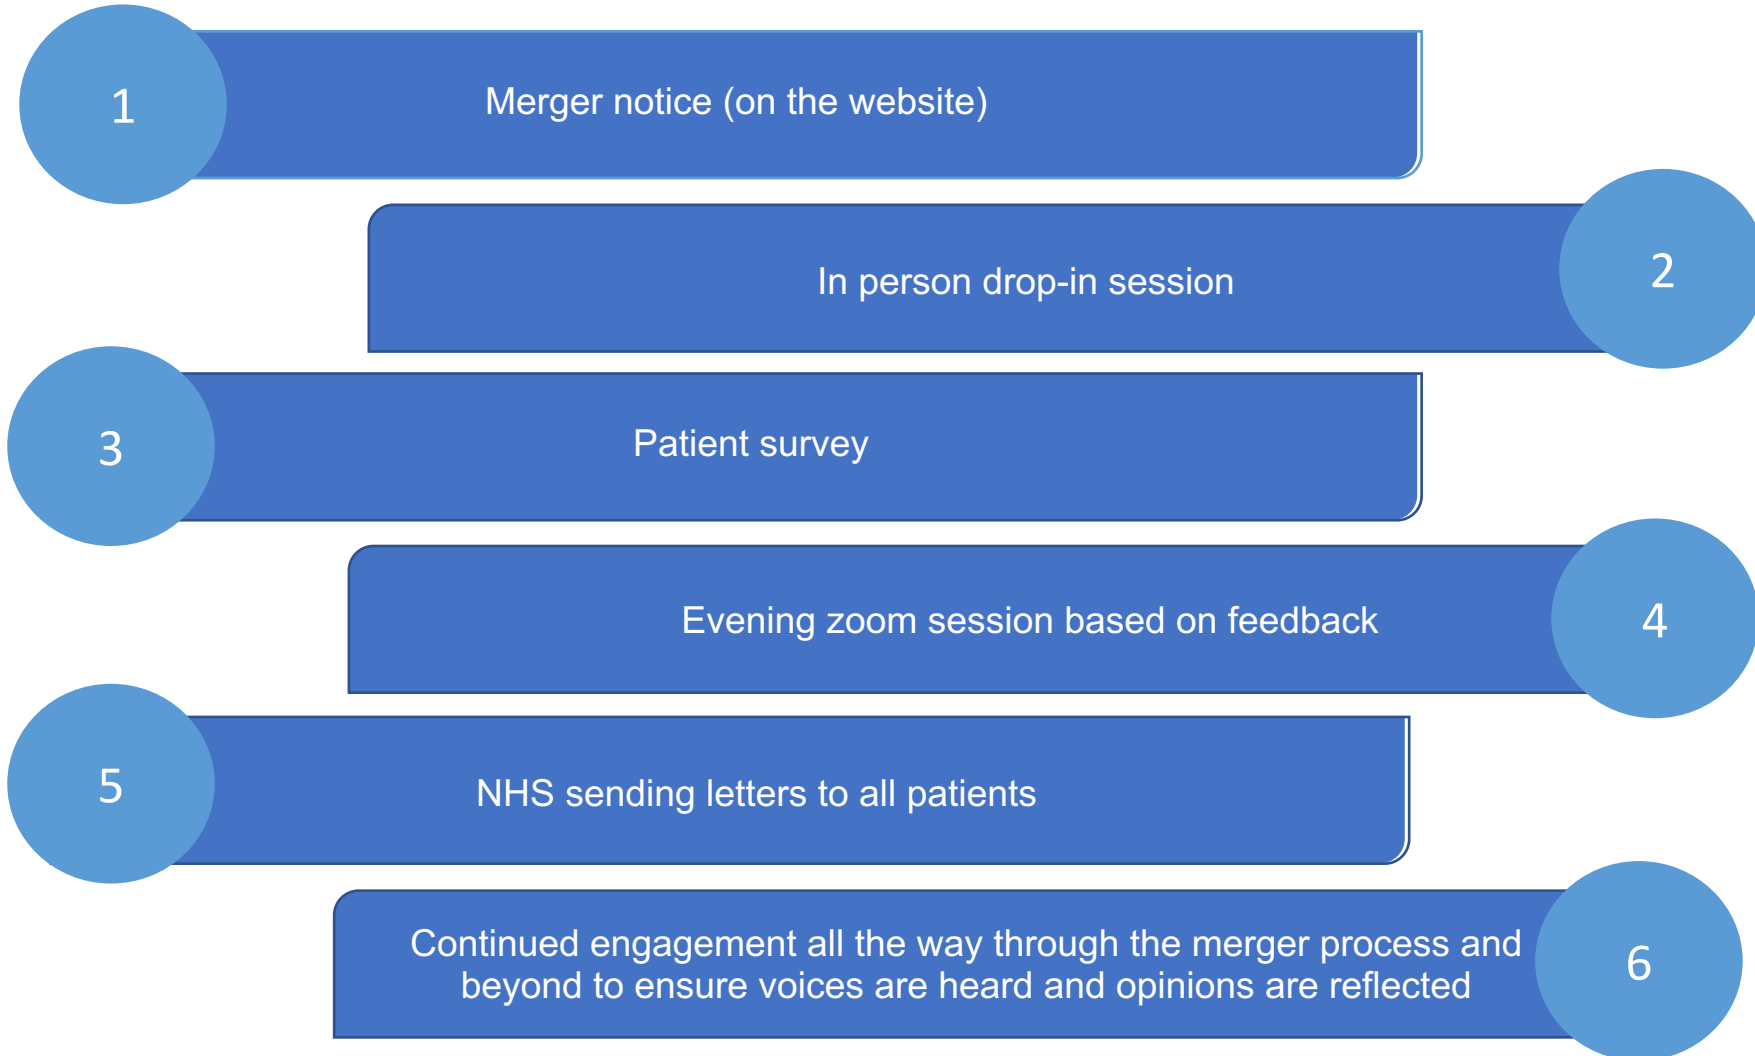

Support our patients to improve their health, wellbeing, management of long-term conditions and social welfare by connecting them to community and voluntary support services available in the local area

Merger Timeline

- The formal merger is planned to take place 1st July 2022.
- However it will take around 6 months from this date to merge our clinical systems and begin to fully integrate our services
