

LIFE THREADS - TBI

Supporting families after Traumatic Brain Injury

CAN YOU HELP US FIND WAYS TO HELP AND SUPPORT FAMILY MEMBERS AFTER TBI?

We are researching a new way to support family members of people with traumatic brain injury and would like to hear from you if:

- you are an adult family member of someone who had a traumatic brain injury* at least two years ago who was 18 years of age or older at the time of injury.
- You are interested in trying something different.
- You feel OK talking to our research team, and other family members, about your experiences
