

## **GREEN PRESCRIBING**

### Social Prescribing in Your area

### Benefits Include:

- Improved mental health
- Reduction in depressive symptoms
- Reduced prevalence in Type II Diabetes
- Improved sleep
- Weight loss

# Health Benefits of Green and Blue Spaces

Studies are consistently showing that spending time in parks and other green spaces has a significant impact on both mental and physical health [1].

Visiting local neighbourhood green spaces has shown high health benefits not just for adults  $_{[2]}$  but also children, especially behaviour and attention problems. $_{[3]}$ 

#### Q: What are Green Spaces?

A: Any outdoor areas with green areas, such as parks, countryside, woods or nature reserves.

#### Q: What about blue?

A: Any areas around water! Studies indicate that you don't have to be in the water to benefit from it—evidence suggests that exposure to blue spaces improves wellbeing.[4]

### How Does Social Prescribing Fit in?

Social Prescribing Link Workers can help sign—post you to an activity that is right for you. By putting you in control and focusing on "What Matters to me" the link workers can help build a programme of activity designed specifically for you.

## Q: What if my anxiety prevents me from trying something new?

A: Your Link Worker or a SBCP volunteer can accompany you to activities and groups. They are here to support you and remove the barriers that

Physical Activity
has multiple
benefits for
cancer patients
before, during
and after
treatment and can
reduce the
likelihood of
breast and bowl
cancer
reoccurring.
