

Protect yourself from flu, have the flu vaccine

Information for people with a learning disability

Protect yourself from flu

Every year in England lots of people get flu in winter. Flu is a virus that makes you feel ill.

Some people with a learning disability are more likely to be very ill if they get flu.

The best way to avoid getting flu is to have a flu vaccine. This is an injection and it is free.

If you are scared of needles, tell the nurse. You may be able to have the vaccine as a spray instead.

Family carers and paid support workers may be able to have the free flu vaccine so they don't pass flu on to you.

Brian goes for a flu vaccine

1

Flu can be dangerous for me

Brian does not want to get flu this winter.

2

I would like a free flu vaccine please

He phones the health centre to make an appointment for a free flu vaccine.

3

Next week he will see the nurse at the health centre.

Pharmacy +

4

He could also get the flu vaccine at a pharmacy.

5

It will help stop Brian getting the flu

His support worker can get a free flu vaccine as well.

6

This will help stop you getting the flu this winter

The nurse explains what she will do.

Brian goes for a flu vaccine

7

The injection is quick and doesn't really hurt.

8

All done!

The nurse tells Brian his arm might be sore for a while.

9

I feel a bit hot

He might also feel a bit hot.

**That's it until
next year!**
