

***"If you have a long-term health condition like Diabetes, high blood pressure, Heart Disease or Asthma, it is essential that we review your condition and treatments at least once a year.***

***This is the only way of ensuring your condition is being managed properly and your treatments are safe. These reviews help to prevent harm in the future from your condition, along with updating your treatments to match the most up to date evidence and guidance.***

***If you are required to take a medication regularly but do not have one of these conditions, you may still need additional monitoring to check the health of your kidneys, liver or blood pressure, so please contact us if you think you are due any investigations. "***
