

Stay happy, healthy and well this winter.

Greater Manchester

## Not sure if you need to get vaccinated this winter, or worried someone you care about needs extra protection?

Viruses common in winter can make some people very unwell and result in serious problems that may need hospital care. That's why this winter the NHS is offering free vaccines to those most at risk of being seriously unwell.

Getting vaccinated also makes it less likely you will pass a virus on to someone else, so it can help to protect those around you too. See overleaf for a list of vaccines available, who can have them and when.

### Difficulties communicating or hearing and want to get an appointment to get vaccinated?

- Call 119 – ask for a translator
- A BSL service is available at: [signvideo.co.uk/nhs119](https://signvideo.co.uk/nhs119)
