

Dear

Invitation to attend face to face training session.

You are invited to attend a face-to-face training session for the FreeStyle Libre 2 flash glucose monitoring system.

During the training session, you will be given a FreeStyle Libre sample and you will be shown how to apply and start your FreeStyle Libre 2 sensor. As part of our instructions for sensor application you will require alcohol wipes. **Alcohol wipes are not provided in the sensor kit** but are readily available at minimal cost from pharmacies and other retailers.

If you intend on using your smartphone, we recommend that you download and sign in to the LibreLink app before you attend the session, as signal in the practice may be limited. This can be easily found on your smart phone's app store.

Finally, for your Diabetes Team to support you remotely please connect to our LibreView practice by entering Practice ID **Insert Practice ID**. You will be shown how to do this as part of your training if you intend on using your smart phone.

You will also have the opportunity to ask any questions you may have during the session.

We look forward to speaking to you soon.

Kind regards,

Alison Jones

PCN Diabetes Care Coordinator

Wyre Forest Partnership

1. Finger pricks are required if your glucose readings and alarms do not match symptoms or expectations. **2.** Haak, Thomas., et al. Flash glucose-sensing technology as a replacement for blood glucose monitoring for the management of insulin-treated type 2 diabetes: a multicenter, open label randomized controlled trial. *DiabetesTherapy* 8.1 (2017): 55-73. **3.** The reader can capture data from the sensor when it is within 1cm to 4cm of the sensor. **4.** Sensor is water resistant in up to 1 metre (3 feet) of water for a maximum of 30 minutes. Do not immerse longer than 30 minutes. Not to be used above 10,000 feet. **5.** Patients choose which device they want to receive alarms: FreeStyle Libre 2 reader or FreeStyle LibreLink app. They must start their FreeStyle Libre 2 sensor with that selected device. Once the patient scans their FreeStyle Libre 2 sensor with that device, they can receive alarms only on that device. The FreeStyle LibreLink app is only compatible with certain mobile devices and operating systems. Please check the website for more information about device compatibility before using the app. Use of FreeStyle LibreLink requires registration with LibreView.
