

A clinical study for adults with asthma

The AIRLYMPUS Study is testing an investigational study drug to see if it can improve breathing and symptoms of asthma and reduce future asthma attacks when taken with standard asthma background therapy.

You may be eligible if you:

- Are 18 to 80 years of age.
- Have had a diagnosis of asthma for at least 12 months.
- Had at least 1 asthma attack in the last year.
- Are taking daily treatment for your asthma.

Additional criteria apply.

Your participation is voluntary.
By participating, you could contribute to the discovery of a new treatment for people like you who have asthma.

If you qualify for the study, you will receive study-related treatment, tests, and doctor visits at no cost to you. You may be in the study for up to 64 weeks.
