

THE LIVING WELL SERVICE

The Living Well Service supports our communities by providing:

Routine UK immunisations and flu

Blood glucose checks

Pulse checks

Mental health support

BMI check

Blood pressure checks

Health checks

Cholesterol check

CWP's Living Well Service is built on the principles of listening to seldom-heard communities and meeting their needs by bringing the right services to them.

Operating as a drop-in service across Cheshire and Merseyside, Living Well provides access to all routine immunisations, a broad range of physical health checks, focused mental health support and discussions around wellbeing concerns.

All activity is recorded and shared with your GP, ensuring ongoing understanding and support for your health is in place.
