

Understanding Frontotemporal Dementia & Supporting Carers Along the Journey: the FTDToolkit

Would you be willing to help researchers develop online materials to support carers?
We are recruiting carers currently supporting a family member living with frontotemporal dementia.

We're developing an online support tool—the FTDToolkit—to help carers manage the symptoms of Frontotemporal Dementia. To make sure the FTDToolkit really works for carers, **we'd love to hear from you.**

Your experience matters!
