Your Care and Artificial Intelligence (AI)

At Bodriggy Health Centre, we sometimes use Artificial Intelligence (AI) to support your care. Here's what you need to know:

What is AI?

AI uses computer systems to help with tasks like checking symptoms or managing appointments. It does NOT replace your doctor's judgment.

Why do we use AI?

To improve efficiency and support clinicians in providing safe, timely care.

Your Safety

All AI tools are checked for accuracy and safety before use.

Your Privacy

Your data is protected under NHS and GDPR rules. We only use what is necessary.

Transparency

We will tell you when AI is used in your care.

Your Choice

You can opt out of AI-supported services. Just let us know.

Questions?

Speak to any member of our team or contact reception for more information.
