AI at Vesper Road Surgery

Vesper Road Surgery are now using TORTUS (an AI software) which allows clinicians to use artificial intelligence to document and summarise consultations, write referrals and increase efficiency at the practice.

VESPER ROAD & MORRIS LANE SURGERY

CONSENT
You will be asked for consent before this software can be used and you can withdraw consent at any time.

PURPOSE
To improve the quality of interactions during consultation, the accuracy in note taking and overall patient satisfaction and care

BENEFITS
-A hands free approach to clinical note taking
-Improving patient satisfaction
-Productivity gains
-Keeping data accurate and safe
-Reducing clinician burnout

WHO HAS ACCESS TO MY DATA?
Only your clinician has access to your data. Tortus is regulated by MHRA (Medicines and Healthcare products Regulatory Agency) ensuring data remains confidential and secure.

WHERE IS MY DATA STORED?
No data is stored on the cloud after processing. By default each consultation will expire and be deleted after 24hours. Tortus complies with UK data protection regulations.
