

What's the GDPR all about?

The **UK General Data Protection Regulation (UK GDPR)** is designed to help you understand who looks after or uses information about you

The people who look after your information are called Data Controllers and they may ask Data Processors to help them to do this.

If you are under sixteen, the rules about who can access your medical records are different depending on your age.

If you are aged 11 or over, you can ask to speak to one of our team about this.

Don't worry, we won't share your information if you don't want us to.

Still got a question

Just ask a member of our friendly team.
