

Refurbishment Update

Due to ongoing refurbishment work, the main entrance of Trinity Medical Centre is currently closed until further notice.

Please use the temporary entrance located on the left side of the building (GPCare side). This is now serving as our main entrance.

Our reception desk and waiting area have also moved to this side of the building. The usual facilities on the right side are temporarily out of use while renovations are underway.

Some on-site parking spaces will be unavailable during the refurbishment. However, additional parking is available behind the surgery on Thornhill Street. We recommend allowing extra time for parking when attending your appointment.

We apologise for any inconvenience and appreciate your patience and understanding as we work to improve our facilities. If you require assistance, our team is happy to help.

For the latest updates, please check our website, social media channels, and future newsletters.

Thank you for your continued support.

Surgery Closures

The surgery will be closed on the following days for UK Public Holidays

Mon 25 Aug

Thurs 25 Dec

Fri 26 Dec

The surgery will be closed on the following afternoons from 12PM for training purposes

Wed 16 Jul

Wed 13 Aug

Wed 17 Sep

Wed 15 Oct

Boundary Change

Thank you to all our patients who took the time to share their feedback in our recent boundary change survey.

We've now submitted the proposed change to the Integrated Care Board (ICB) and are currently awaiting the outcome of this.

Menopause: Ask the Expert

Our popular Menopause Ask the Expert sessions are now running online via Microsoft Teams due to the ongoing refurb at TMC.

We aim to run these informative sessions every two months, with the next one planned for September.

Interested in attending? Simply scan the QR code to register your interest. Once registered, you'll receive updates about upcoming sessions straight to your inbox.

We also share event details on our website and Facebook page, so be sure to follow us there for the latest updates.
